

# CloudXeus Support Plans and SLA Guide

Customer Support Policy - Effective June 2026

## Support Plan Summary

CloudXeus offers three support plans: Essential, Professional, and Premium. Each plan defines support hours, response targets, escalation handling, and advisory access.

| Plan         | Support hours                                                    | Initial response target                                          | Included advisory time |
|--------------|------------------------------------------------------------------|------------------------------------------------------------------|------------------------|
| Essential    | Monday to Friday, 9:00 AM to 5:00 PM<br>Gulf Standard Time       | 8 business hours                                                 | None                   |
| Professional | Monday to Friday, 8:00 AM to 8:00 PM<br>Gulf Standard Time       | 4 business hours                                                 | 2 hours per month      |
| Premium      | 24x7 for severity 1 incidents; weekdays<br>for standard requests | 1 hour for severity 1; 4 business<br>hours for standard requests | 6 hours per month      |

## Severity Definitions

| Severity   | Definition                                                                     | Examples                                                                                      |
|------------|--------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------|
| Severity 1 | A production service is unavailable or a critical business process is blocked. | Customer portal down, payment API unavailable, security incident affecting production access. |
| Severity 2 | A major feature is degraded but a workaround exists.                           | Reporting latency, intermittent integration failures, performance degradation.                |
| Severity 3 | A non-critical issue, configuration request, or general question.              | How-to guidance, user access request, non-urgent enhancement.                                 |

## Premium Weekend Support

Premium customers receive weekend and holiday coverage only for Severity 1 incidents. Standard how-to questions, change requests, reporting requests, and advisory sessions remain scheduled during weekday support hours.

A weekend request is treated as Severity 1 only when there is confirmed production impact, no reasonable workaround, and an authorized customer contact has approved emergency handling.

## Escalation Rules

- Severity 1 incidents are assigned to an on-call cloud engineer and a service delivery manager.
- If no response is sent within the target window, the ticket is automatically escalated to the support duty manager.
- Customers must provide business impact, affected environment, timestamp, screenshots or logs, and recent change details.
- CloudXeus does not perform emergency production changes without approval from an authorized customer contact.
