

Acceptable Use Policy (AUP)

1. Purpose

This policy defines the acceptable use of CloudXeus Corporation services. It applies to all customers, users, and API integrations on every plan.

2. Prohibited activities

Customers may not use CloudXeus services to:

- Send unsolicited bulk email (spam) or operate open mail relays
- Host, distribute, or link to malware, phishing pages, or other malicious content
- Attempt to gain unauthorized access to CloudXeus systems or other customers' data
- Conduct denial-of-service attacks or network scanning against third parties
- Store or process content that is illegal in the customer's jurisdiction
- Resell CloudXeus services without a signed reseller agreement
- Mine cryptocurrency on CloudXeus compute resources

3. Fair use and resource limits

Resource	Basic	Pro	Enterprise
API requests	10,000 / day	100,000 / day	Per contract
Storage included	50 GB	500 GB	Per contract
Concurrent sessions	5	50	Per contract

Sustained usage above plan limits may result in throttling. Customers who regularly exceed Pro limits are contacted by their account manager to discuss an Enterprise agreement.

4. Security responsibilities

Customers must:

- Keep account credentials confidential and enable multi-factor authentication for administrator accounts
- Rotate API keys at least every **180 days**
- Report suspected account compromise to CloudXeus within **24 hours** of discovery

5. Enforcement

CloudXeus enforces this policy in stages, depending on severity:

- **Notice** — written warning with 7 days to remediate
- **Throttling** — temporary limitation of the offending workload
- **Suspension** — account access suspended until remediation is confirmed
- **Termination** — account closed for repeated or severe violations

For violations that pose immediate risk to other customers or to CloudXeus infrastructure, CloudXeus may suspend service immediately and without prior notice.

Suspension or termination under this policy does not entitle the customer to a refund, and SLA service credits do not accrue during enforcement actions.

6. Reporting abuse

Suspected violations of this policy can be reported through the CloudXeus support portal under the category **Trust & Safety**. Reports are acknowledged within 1 business day.
